# Getting Started

---

First of all, I would like to thank you for purchasing this theme. We've put in lots of love in developing this Prestashop theme and are excited that you've chosen this theme for your website. We hope you find it easy to use our theme. This documentation guides you through the main features of the theme and guides you how to use and customize the theme.

If you are unable to find your answer here in our documentation, feel free to ask for help from our support team.

# Download packages

---

Once the download is complete, unzip the file and you would see the following packages:

Doc - our detail documentation for the theme

Themes - for manual installation

Modules - the installation packages of all modules used in the theme

Config.xml – for automatically installation

# Preparations

---

The PrestaShop e-commerce engine requires a MySQL database to store data. Prior to installing PrestaShop, please make sure you have already created a MySQL database. This can be done through your hosting control panel using the phpMyAdmin tool.

Please check the detailed tutorial on how to create a MySQL database. If any issues occur, please contact your hosting provider for further assistance. While installing your MySQL database, you will need to specify the database name, username, password and the database server. Remember these details as you will need them for PrestaShop installation.

# Server Requirement

---

Prestashop requires certain technical requirements to be met for the store to operate properly. First, a web server must be created to make the Prestashop store publicly available on the web. Domain names and hosting services can easily be purchased for an affordable price.

When selecting a hosting service, you should check to see that these server requirements are provided and installed on their web servers:

Supported operating system: Windows, Mac and Linux

Wamp (for Windows) or Xampp (for Windows and Mac)

PHP 5.1+ installed and enabled

MySQL 5.0+ installed with a database created

PHP configuration:

"memory\_limit" should be at least "64M"

"file\_max\_upload\_size" to "16M"

"allow\_url\_fopen" should be set to "on"

"register global" should be set to "off"

"safe\_mode" should be set to "off"

Optional PHP extensions:

GD

CURL

SimpleXML

SOAP

Permissions:

Permissions for all files should be set to "664"

Permissions for all folders should be set to "755"

If you don't know how to check these requirements, ask your hosting provider.

# Theme Installation

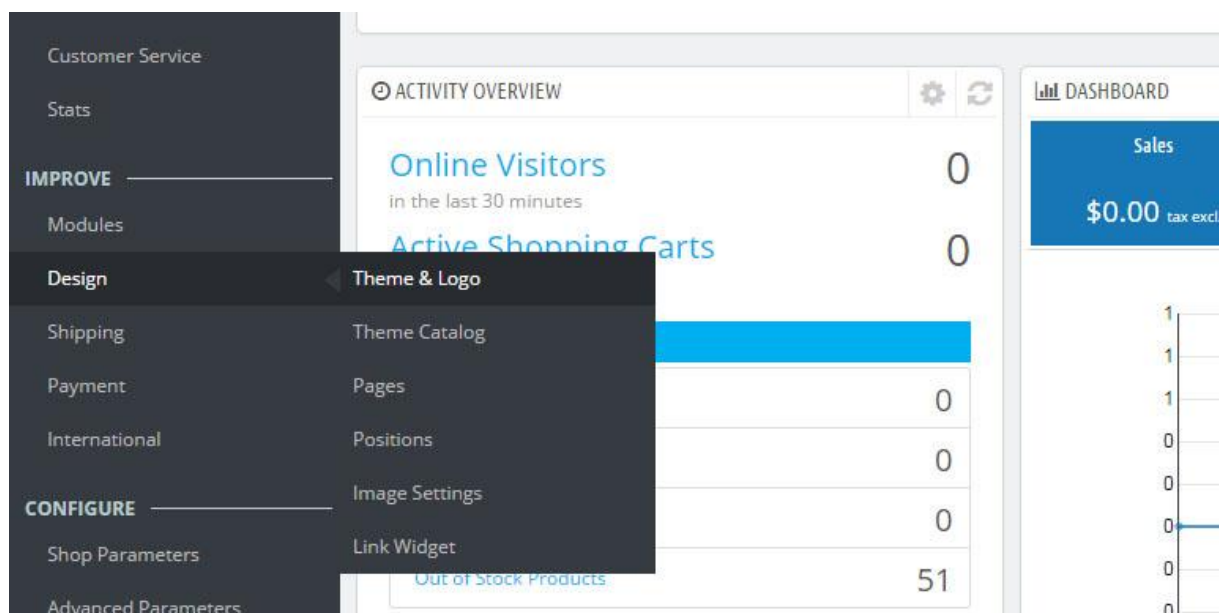

Installing a themes is super easy. Before you install this theme:

1. Read our complete instruction to install theme
2. Make sure you have installed and running the correct version of Prestashop:  
Prestashop 1.7.x
3. Take a FULL BACKUP for your site

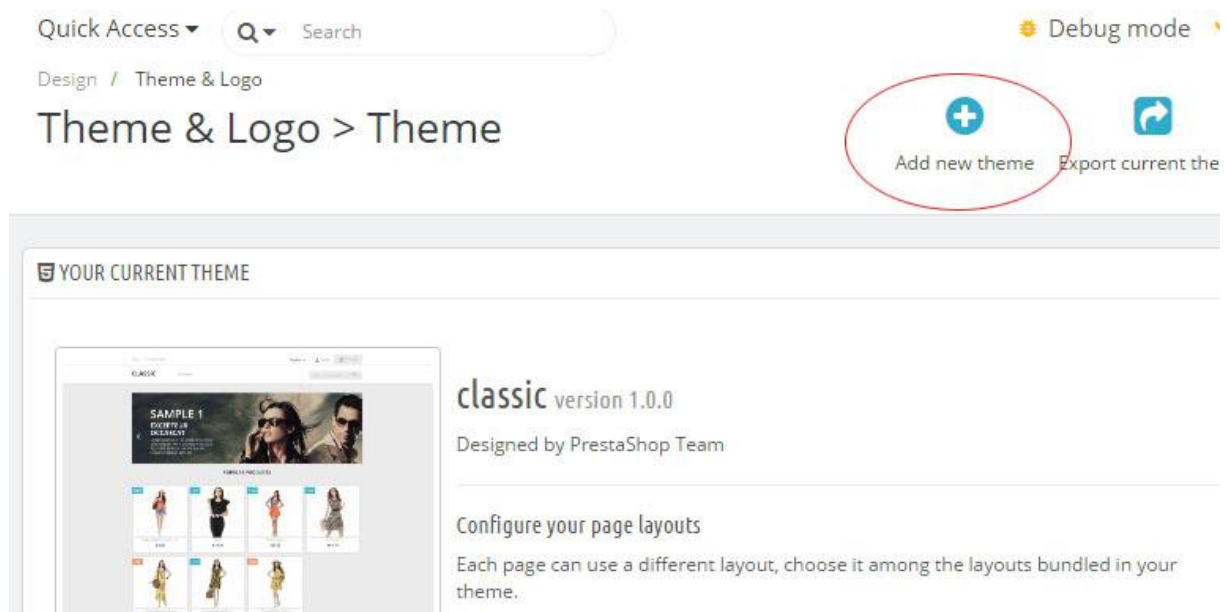

We recommend to use this theme on a new, clean installation or existing shops without custom core modifications.

Steps to install theme manually:

1. Navigate to **Design** → **Theme & Logo** in your **Prestashop admin dashboard**.

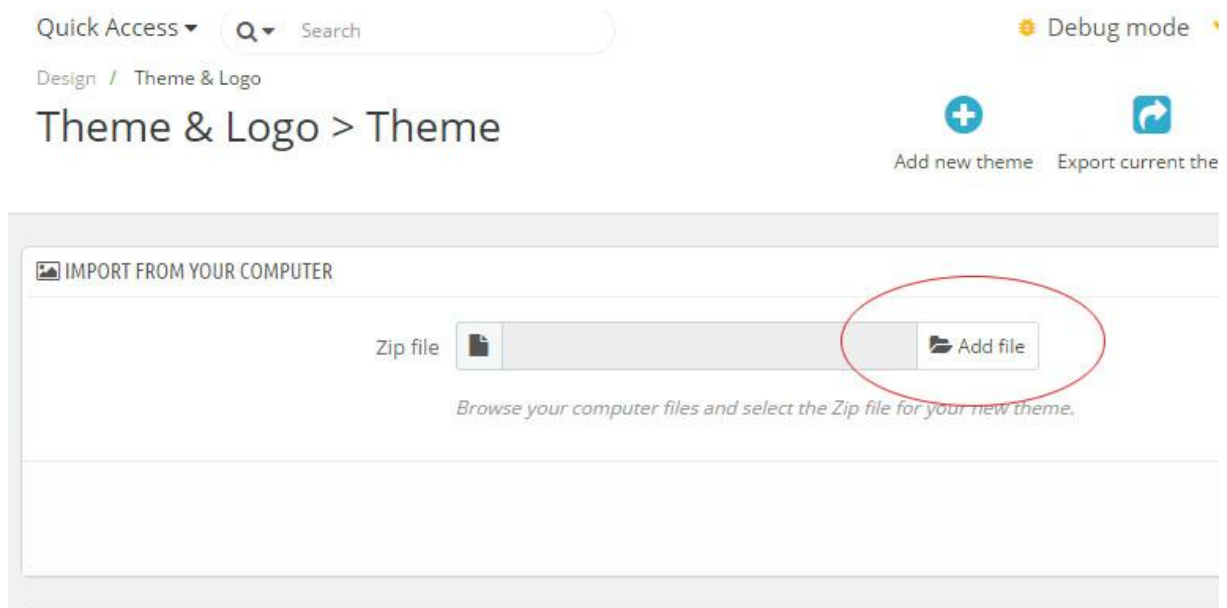

2. Click the **Add New Theme** button at the top of the page and go for the **Import option**. ( you can import from your computer, from web or from FTP)

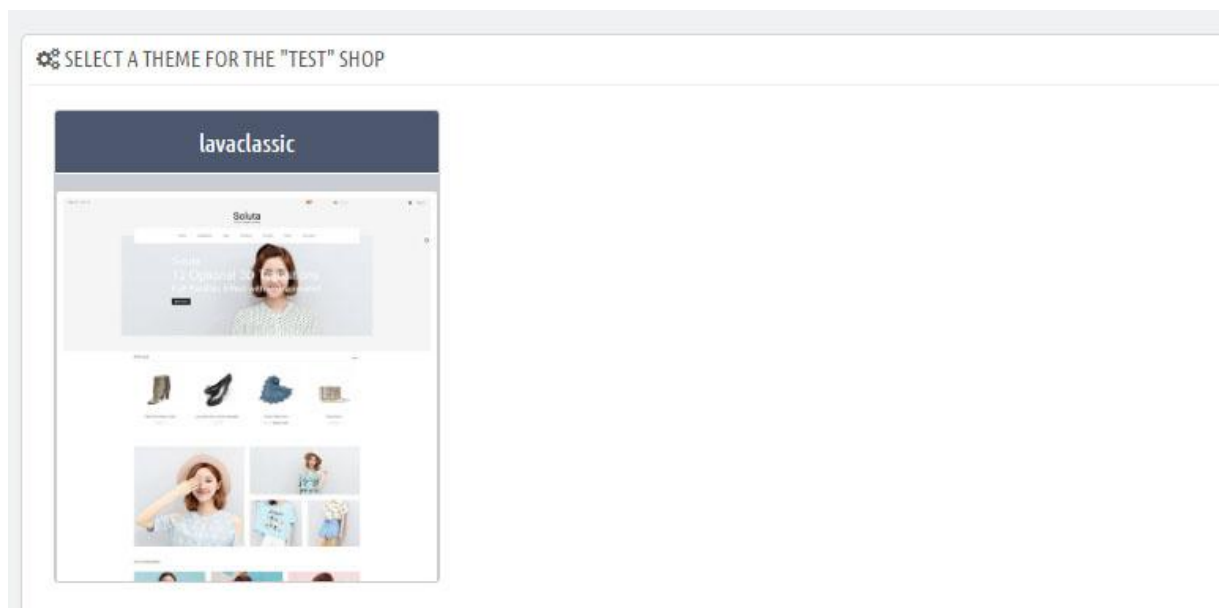

3. Click **Add file** from "IMPORT FROM YOUR COMPUTER" option. For the file upload, pick **Theme package/ name\_theme.zip** in the theme package and click Save.

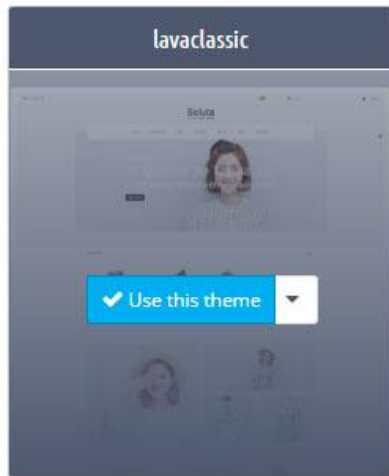

4. If success, you will see the theme appear.

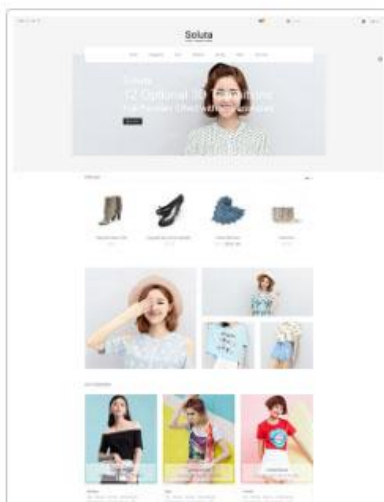

5. Then click **Use this themee.**

⚙️ SELECT A THEME FOR THE "TEST" SHOP

6. The installation is finish.

# Theme Configuration

Our theme has a Theme Control Panel module that allows you to manage and customize your theme easily based on the powerful, intuitive and friendly admin panel with tons of built-in functionality.

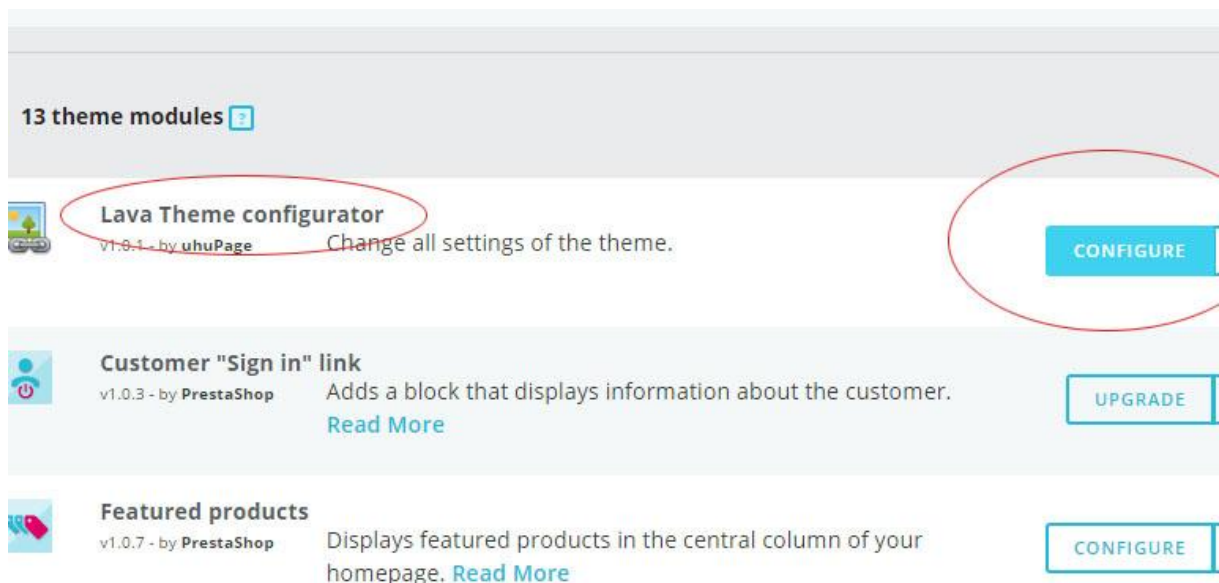

From your **Prestashop admin dashboard**, go to **Modules > Modules & Services**.

Click **Installed Modules**.

Find module **Lava Theme configurator**, then click

# Get Support

---

If you are unable to find your answer here in our documentation, please go to the forum and post up a new topic with all the details we need. Please be sure to include your site URL as well or send us an email.

## **Support scope**

Our support covers configuration, building site as demo, trouble using any features, and bug fixes. We don't provide support for customizations or 3rd party extension.

## **Support time**

We try our best to monitor the email around the clock, however, this is not always possible due to different time zones. We will try to reply you as fast as we can.

Our working time is 9.00 AM - 5.00 PM, Monday to Friday (GMT+8). So if ask for help in the weekend, you may have to wait a little bit for support and please be patient.
